NARENDRA PRASAD

Web Developer | Frontend Developer

ladnp14@gmail.com 6379998226 NarendraPrasad NarendraPrasad

CAREER OBJECTIVE

Motivated and detail-oriented Computer Science graduate seeking an entry-level or internship role as a Web Developer and Entry-Level Python Engineered. Eager to apply foundational programming knowledge, hands-on project experience, and a passion for continuous learning to contribute meaningfully to a dynamic technology team.

EDUCATION

MAM College of Engineering *2022 – 2026*

B.E. in Computer Science and Engineering | Anna University, Trichy

TECHNICAL SKILLS

Programming Languages: Python (Beginner), HTML, CSS, JavaScript, SQL

Machine Learning & AI: Machine Learning, Deep Learning, CNN, Random Forest, TensorFlow, Data Preprocessing, Model Evaluation

Tools & IDEs: Visual Studio Code (VS Code)

Soft Skills: Problem-Solving, Analytical Thinking, Communication, Teamwork, Self-Learning

INTERNSHIP EXPERIENCE

Data Analytics – VDart Academy *Trichy, India*

Internship | Duration: Short-term | Jan 2026 – Jul 2026

- *Utilized Python for data extraction, cleaning, transformation, and analysis, contributing to a 25% improvement in data processing efficiency.*
- *Analyzed customer behavior and business data to identify meaningful trends and actionable insights, supporting marketing strategies that improved customer retention by 10%.*
- *Performed data validation and quality assurance to maintain 99% accuracy in weekly analytical reports.*
- *Applied analytical thinking and problem-solving skills to support data-driven decision-making and improve reporting processes.*

ACADEMIC & PERSONAL PROJECTS

Online Payment Fraud Detection Using Machine Learning (Final Year Project)

Python | TensorFlow | Keras | CNN | OpenCV | Librosa | Flask

- Developed a machine learning-based fraud detection system to identify potentially fraudulent online payment transactions and enhance transaction security.
- Performed comprehensive data preprocessing, including data cleaning, feature selection, and Exploratory Data Analysis (EDA), to improve data quality and model performance.
- Implemented and compared multiple machine learning algorithms, including Logistic Regression, Decision Tree, Random Forest, and XGBoost, to evaluate fraud detection capabilities.
- Utilized Python libraries such as Pandas, NumPy, and Scikit-learn for data manipulation, feature engineering, and predictive model development.
- Evaluated classification models using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix to assess prediction performance.
- Designed a transaction classification system to distinguish between legitimate and fraudulent transactions based on transaction patterns and relevant features.

CERTIFICATIONS & TRAINING

Cloud Engineering *Google*

- Completed foundational training in Cloud Engineering, developing knowledge of cloud infrastructure, cloud computing fundamentals, and deployment concepts.

Android App Development *Google – SmartBridge*

- Successfully completed an Android development training program, gaining practical exposure to mobile application development concepts and Android development fundamentals.

Experience-Based Project Learning *IBM*

- Participated in an industry-focused, project-based learning program, strengthening technical problem-solving, analytical thinking, and practical application of technology concepts.

Microsoft Office Essentials *Microsoft*

- Completed certification training in Microsoft Office applications, developing proficiency in Word, Excel, and PowerPoint for professional documentation, data organization, and presentations.

DECLARATION

I hereby declare that all the information furnished above is true and correct to the best of my knowledge and belief.
